# Contents at a Glance

Introduction	1
<b>PART I Installing and Learning About Your System</b>	<b>5</b>
Hour 1 Getting Started with Red Hat Linux 7.0	7
2 Installing Red Hat Linux 7.0	15
3 Linux Basics	35
4 Exploring the Red Hat Linux Filesystem	55
5 Using the Visual Editor	69
6 XFree86—The Linux Window System	85
<b>PART II Using Red Hat Linux 7.0</b>	<b>109</b>
Hour 7 Using the GNOME Desktop Environment	111
8 Setting Up a Printer and Other Devices	127
9 Connecting to the Internet Part 1	145
10 Using the Internet	165
11 Linux Applications	179
12 Linux Productivity Applications	193
13 Fun and Games	207
<b>PART III Linux Foundations</b>	<b>217</b>
Hour 14 The Linux 2.4 Kernel	219
15 Working with Shells	233
16 Administering the System	251
17 Using linuxconf and Graphical Administration Tools	271
18 Setting Up a Simple Network	285
<b>PART IV Advanced Topics</b>	<b>305</b>
Hour 19 Integrating Linux and Windows	307
20 What Every User Should Know About Security	327
21 Automating Tasks with Shell Scripting	343

22	Troubleshooting and Getting Help	357
23	Compiling and Installing Applications from Source Code	371
24	Introduction to Linux Programming	383
	Index	399

# About the Authors

**Judith Samson** is a writer and graduate student in math and computer science at Eastern Michigan University. She has written three books and numerous articles on Linux, and contributes to the GNOME Project. She is the author of *Sams Teach Yourself GNOME in 24 Hours* and *Sams Teach Yourself WordPerfect Office 2000 for Linux in 24 Hours*.

**Jason Byars** (<mailto:darth@purdue.edu>) is a graduate student at Purdue University. He has a Bachelor of Science degree in computer engineering and enjoys both the hardware and software aspects of the field. His interests draw him to robotics, 3D graphics, software development, and IT work. He has been a fan of Linux since going to Purdue in the fall of 1996.

**Dallas Releford** has worked as a writer, technical editor, reviewer, consultant, and just about everything else in the publishing field. At present, he has worked on more than 60 books on computers for such companies as Macmillan, Sybex, and many smaller companies. He has published more than 30 full-length articles on everything from computers to how to set up a solar-powered house suitable for the year 2000.

# Dedication

*To Mom and Dad—Judith Samson*

# Acknowledgments

Thanks to Dallas and Jason for contributing their expertise and talents to this book. I definitely couldn't have done anything without you! Thanks to my agent, Christian Crumlish, for all your support and encouragement. Thanks to Betsy Brown, acquisitions editor, for putting up with me and keeping me honest, and to Laura Williams, development editor, for all your great work and for giving me this opportunity. Thanks also to Amy Patton, Carol Bowers, Kim Cofer, and Barbara Hacha. Finally, thanks to Bram Moolenaar, Jack Wallen, and John Fleck for your advice and help, and to Alain, for everything.

*—Judith Samson*

I would like to thank everyone at Macmillan for helping me through this project. Shelley and Heather, thank you for giving me the opportunity. Laura and Betsy, thank you for being so patient and supportive during this hectic semester. Dallas, thank you for double-checking all the little details that bothered me. Finally, I would like to thank my friends and my parents for their support and their efforts to keep me sane while working on this book.

*—Jason Byars*

I would like to extend my everlasting gratitude to Betsy Brown and Laura Williams, the development editor at Macmillan who worked with me during this time. Thanks also to Carol Bowers, Kim Cofer, and Barbara Hacha. I also would like to thank my coauthors Judith Samson and Jason Byars. My special thanks to Jason for his assistance and help. Of course, I would like to extend my thanks to all those people who work behind the scenes to make this book and all other books possible. Without them, writers wouldn't get very far.

I should also thank my next door neighbor, Ron Baker, who did most of the work on my new office while I was buried in getting my work on the book completed. And last of all, but not least, I want to thank my wonderful wife Sharon, who really made this possible because she did all the work that I would normally do.

*—Dallas Releford*

# Tell Us What You Think!

As the reader of this book, *you* are our most important critic and commentator. We value your opinion and want to know what we're doing right, what we could do better, what areas you'd like to see us publish in, and any other words of wisdom you're willing to pass our way.

You can email or write me directly to let me know what you did or didn't like about this book—as well as what we can do to make our books stronger.

*Please note that I cannot help you with technical problems related to the topic of this book, and that due to the high volume of mail I receive, I might not be able to reply to every message.*

When you write, please be sure to include this book's title and author as well as your name and phone or fax number. I will carefully review your comments and share them with the author and editors who worked on the book.
