

PHARMACOLOGY

FOR THE

PHYSICAL THERAPIST

PETER C. PANUS, PHD, PT ■ **BERTRAM KATZUNG, MD, PHD** ■ **ERIN E. JOBST, PT, PHD**
SUZANNE L. TINSLEY, PT, PHD ■ **SUSAN B. MASTERS, PHD** ■ **ANTHONY J. TREVOR, PHD**

The first pharmacology book written for physical therapists by PhD pharmacologists who are also PTs

Based on the classic Katzung's **Basic and Clinical Pharmacology**, this groundbreaking book illuminates the ever-expanding role of pharmacology in rehabilitation practice. In it you'll find valuable insights on the full range of pharmacology topics, from analgesics and muscle relaxants, to cancer chemotherapy — all told from the vantage point of the practicing physical therapist.

F E A T U R E S

Complete, up-to-date descriptions of common adverse drug reactions relevant to physical therapy

Explanations of how drugs can disrupt functional and clinical outcomes, along with corresponding physical therapy-based solutions to overcome these issues

"Problem-Oriented Patient Studies," which feature the patient as the focal point of the case rather than drug therapy itself

"Preparations Available" boxes that provide at-a-glance summaries of the drugs available to treat specific conditions and disorders

Glossary of need-to-know terms

Notice

Medicine is an ever-changing science. As new research and clinical experience broaden our knowledge, changes in treatment and drug therapy are required. The authors and the publisher of this work have checked with sources believed to be reliable in their efforts to provide information that is complete and generally in accord with the standards accepted at the time of publication. However, in view of the possibility of human error or changes in medical sciences, neither the authors nor the publisher nor any other party who has been involved in the preparation or publication of this work warrants that the information contained herein is in every respect accurate or complete, and they disclaim all responsibility for any errors or omissions or for the results obtained from use of the information contained in this work. Readers are encouraged to confirm the information contained herein with other sources. For example and in particular, readers are advised to check the product information sheet included in the package of each drug they plan to administer to be certain that the information contained in this work is accurate and that changes have not been made in the recommended dose or in the contraindications for administration. This recommendation is of particular importance in connection with new or infrequently used drugs.
