The background of the cover is a photograph of the Parthenon in Athens, Greece. The temple's facade, with its iconic Caryatid Porch, is the central focus. The Caryatid Porch features four female caryatids (columns) that support the roof. In the background, a dense urban landscape of Athens is visible, set against a backdrop of rugged, green mountains under a clear blue sky.

Destination Greece

What is it that calls so many of us to Greece? Perhaps it's the endless miles of aquamarine coastline with some of Europe's cleanest beaches. Or the ancient sights that you've read about all your life and want to see with your own eyes. Maybe it's the slow-paced island life where days melt from one to the next, or the adrenalin-rushing possibilities of the mountainous terrain. It's easy to understand how so many myths of gods and giants originated in this vast and varied landscape, with wide open skies and a sea speckled with islands. Greece is also the birthplace of drama and democracy, of western science and medicine. It's been said that, in many ways, we are all the sons and daughters of Ancient Greece. Perhaps we're simply being called home.

Once you arrive, it's not too difficult to find the Greece you were hoping for, whether it's the pulsing nightclubs of Mykonos or the solemnity of Meteora; the grandeur of Delphi or the earthiness of Metsovo; the rugged Cretan hillsides and the lush wildflowers of spring. You'll quickly become acquainted with the melancholy throb of *rembetika* (blues songs), the tang of homemade tzatziki, and the ability of the ancient sights to unleash an imagination you might not have realised you had.

Nevertheless, while ancient sights might take the limelight in many tourist itineraries, the Greeks certainly aren't stuck in the past. Sure, it's easy to find remote, traditional villages with brilliant white buildings and roaming donkeys and goats, but the shepherd will likely be talking on their mobile phone and making a date for the local, trendy cafe. Athens has a firm grip on style and sophistication to rival any European capital. The Greek modern art scene is fresh and vibrant, and the political scene is passionate. It's a nation that welcomes and even insists upon change – from the unstoppable urban renewal taking place in Athens to the internet cafes found on the smallest islands and modern, impressive museums popping up around the nation. There are few cultures that embrace the past so fondly while simultaneously welcoming the future with open arms.

Like everywhere, it's not always smooth sailing in Greece. When problems do arise, they're debated and handled with a strong will, as is evident in the heated conversations outside the local *kafeneio* (coffee house). The past three decades of increased wealth and improved living standards have gone hand in hand with rising unemployment, growing public debt and a credit crunch that's left many Greeks disillusioned and angry. The government's proposals of reforms in pensions and labour, plans for privatisation, and alleged corruption, incited many Greeks to take to the street in massive strikes and protests.

FAST FACTS

Population: 11.26 million

Percentage of women: 50%

Life expectancy: 80 years

Inhabitants per square kilometre: 87

Tourists: 18.8 million annually

GDP: US\$345 billion

Per capita income: US\$32,005

Inflation: 1.57%

Unemployment: 9.3%

External debt: US\$92.19 billion

Since the early '70s, battles between youth and the police have been a mainstay of Greek society. Increases in youth unemployment and downward mobility have added fuel to the youth movement and protests in December 2008 resulted in the death of a 15-year-old, shot by the Athenian police in the student neighbourhood of Exarhia. News of the shooting quickly spread (largely via texting, Facebook and Twitter) and hundreds of youth took to the streets in a social uprising that lasted for days and threatened to topple the government.

The colossal fires of 2007 also sparked distrust in the government for the way in which they were (or weren't) dealt with. Today you'll find student groups, environmental charities and locals teamed up with expats working to reforest the country. Greeks are, in general, becoming increasingly aware of environmental degradation, with calls for bans on sprawling development and more opportunities to recycle. Climate change, diminished water supplies and the rising of sea levels are very real concerns for Greeks. But the debate is often tangled in the mixed interests of locals versus developers or backdoor deals with local government.

On the global front, Greece has become a truly multicultural nation in recent years and the pros and cons of this are another hot topic of conversation. Once an emigrant country, with thousands of Greeks moving to North America and Australia, and later a popular refuge for expats, Greece now sees a huge influx of illegal migrants from Afghanistan, Iraq and Africa who cross the border from Turkey. As islands such as Samos struggle to house boatloads of migrants, there is mounting criticism from the international community on the poor conditions and treatment of refugees and immigrants in Greece. With the lowest acceptance rate in Europe for asylum requests (only 379 out of 20,000 were accepted in 2008), many illegal immigrants and refugees simply disappear into Greece's informal economy or attempt to cross into other European countries. Others linger in shanty towns and deportation centres.

All of this would have once been discussed in a haze of smoke at the local *kafeneio* but in July 2009, Greece brought in antismoking laws similar to those across Europe,

meaning all public places should be smoke free. Greeks are some of the heaviest smokers in Europe and it will be interesting to see how well this law is enforced, particularly in the small villages, remote islands and party hubs. It seems likely that the majority will continue to rule.

Despite these passionate debates and controversy, Greece is essentially a laid-back place. Lounge at the cafe over an endless coffee, stroll along the seafront, park yourself on the beach and take your time over meals and you'll fit right in. Greeks know how to enjoy life and are renowned as some of the most hospitable people on the globe. Their generosity and warmth is as genuine as the soft sand between your toes and the warmth of the Aegean sun.

WHEN TO GO

Spring and autumn are the best times to visit Greece; specifically May, June, September and October. Most of the country's tourist infrastructure goes into hibernation during winter, particularly on the islands (and in some places you'll be hard-pressed to find a hotel or restaurant open). Some of the smaller islands close completely as islanders head off to alternative homes on the mainland for a few months. Many hotels, seasonal cafes and restaurants close their doors from the end of October until mid-April; bus and ferry services are either drastically reduced or cancelled.

The cobwebs are dusted off in time for Orthodox Easter (usually in April; [Click here](#)), when the first tourists start to arrive. Conditions are perfect between Easter and mid-June, when the weather is pleasantly warm in most places; beaches and ancient sites are relatively uncrowded; public transport operates at close to full schedules; and there's a bigger variety of accommodation options to choose from.

Mid-June to the end of August is high season, when everything is in full swing and the majority of festivals take place. It's also very hot – in July and August the mercury can soar to 40°C (over 100°F) in the shade just about anywhere in the country; most beaches are crowded; many ancient sites are swarming with tour groups; and in some places, accommodation is booked solid. The high season starts to wind down in September and conditions are ideal once more until the end of October.

See Climate [Click here](#) for more information.

By November the endless blue skies of summer have disappeared. November to February are the wettest months and it can get surprisingly cold. Snow is common on the mainland and in the mountains of Evia and Crete; it even occasionally snows in Athens. But there are also plenty of sunny days and some visitors prefer the tranquillity that reigns at this time of year.

COSTS & MONEY

DON'T LEAVE HOME WITHOUT...

Bags feel twice as heavy in the heat. Clothes also dry super fast under the Greek sun, so don't take more than you really need.

- A few novels or a deck of cards to while away the hours spent riding ferries.
 - A shady hat, sunglasses and sunblock – indispensable in Greece's hot climate.
 - An inflatable neck pillow and eye shades – for those long bus and train journeys.
 - Lonely Planet's *Greek phrasebook* – talk like the locals.
 - CDs – life-saving if you rent a car in a remote area.
 - A bathing suit in your daypack – for those unexpected coves and beaches.
 - Sturdy, nonslip shoes – many sights, historic towns and villages have slippery, rocky paths.
 - A penchant for octopus – it's on nearly every island menu.
 - Insect repellent – to ward off mosquitoes and sand fleas.
-

Prices have rocketed since the adoption of the euro in 2002 and, although they appear to be levelling off, Greece is no longer the cheap country it once was. While tiny hole-in-the-wall restaurants continue to deliver hearty meals for low prices, eating out anywhere more upmarket has become a pricey venture. Accommodation has also skyrocketed, making many of the budget options not really worth the price and many of the midrange options appearing much more worthwhile.

A rock-bottom daily budget for a solo traveller is about €50. This would mean buses, staying in youth hostels or camping, and only occasionally eating in restaurants or taking ferries. Allow €100 per day if you want your own room and plan to eat out, travel about and see the sights. If you want comfortable rooms and restaurants all the way, you will need closer to €150 per day. These budgets are for individuals travelling in high season (mid-June to late August). Couples sharing a room can get by on less.

Your money will go much further if you travel during the quieter months of May to mid-June and September to October. Particularly on the islands, accommodation is a lot cheaper outside high season. You will also be able to negotiate better deals if you stay a few days. Families can achieve considerable savings by looking for self-catering apartments and shopping for food and drink at supermarkets and local produce markets. Travelling by boat can also save money as children under five board for free and you can save a night's accommodation.

Prices quoted throughout this book are for the high season of mid-June to late August.

HOW MUCH?

Local telephone call per minute €0.30

Minimum taxi fare €4

Single Greek coffee €2

City bus ticket €1

Greek salad €6

TRAVELLING RESPONSIBLY

As with many popular European destinations, Greece's environment is pushed to the limit each year by the massive influx of tourists. While the bigger picture can seem rather overwhelming to an individual tourist [Click here](#), there are a number of things you can do that can help lessen the impact without compromising your holiday.

The first thing to consider is how you will travel to Greece. While short vacations don't always offer the luxury of avoiding the carbon footprints involved in flying ([Click here](#)), reaching Greece from the rest of Europe by train and/or boat is a viable option for those with a little more time. [Click here](#) for options. The experience of long-distance train travel can also be a highlight of your trip.

Next consider when you're going to travel. Visiting Greece on the shoulder seasons – early spring or autumn – means the weather is more bearable and puts less pressure on precious resources such as food and water. This is particularly true on the islands.

Once you're there, how you get around can make a difference to the environment. Not everyone (in fact, very few of us!) have the gumption and stamina to tackle the hilly, hot terrain on bicycle, but you can opt for local buses and trains rather than planes or rented cars, or for fast, fuel-economic ferries rather than slow gas-guzzlers. We've got all of the information you need to tackle the local transport; [Click here](#) and [Click here](#) for more details.

Water scarcity is a serious problem throughout much of Greece; a number of islands are without their own source. It's impractical to avoid buying bottled water entirely. On some of the remote and smaller islands, tap water is not safe to drink (unless you boil or purify it); always ask locally. When buying bottled water, choose Greek brands (which are everywhere) rather than European brands that have travelled further and therefore come with a larger carbon footprint. You can also cut down on water use by not requesting hotels to wash your towels daily and by taking quick showers.

'Organic' and 'green' are increasingly popular buzzwords in Greece. The rise in agrotourism means more options for staying in local, environmentally friendly places. You'll also find increasing options for recycling and for buying organic food, and for guided activities such as hiking and cycling. As much of Greek cuisine is based on local produce, restaurant proprietors are catching on to the movement and advertising their dishes as locally sourced and, in many cases, organically grown. Shops are also selling local, organic herbs, honey, soap and other wares as souvenirs, making it possible to support the local economy and the environment in one go. You'll find

many of these greener options listed in our GreenDex.

TRAVEL LITERATURE

Travel writers can be a great source of inspiration for those planning to follow in their footsteps.

- **92 Acharnon Street** (John Lucas; 2007) A view into contemporary Greece from the perspective of a visiting English professor at the University of Athens. It reflects the changes that took place during the '80s and covers politics to poetry.
- **Eurydice Street: A Place In Athens** (Sofka Zinovieff; 2004) An engaging tale of an expat in Athens. The book takes in customs, etiquette, culture and modern history. Recommended by Greeks for its accuracy of modern Greek culture.
- **Falling for Icarus: A Journey Among the Cretans** (Rory MacLean; 2004) The author journeys to Crete to live out his dream of constructing and flying his own plane and entwines his tale with history, myths and portrayals of village life.
- **It's All Greek to Me!** (John Mole; 2004) The humorous and much-acclaimed account of an English family converting a stone ruin into a home on Evia, including their outlandish attempts to 'fit in'.
- **My Family and Other Animals** (Gerald Durrell; 1977) The classic, witty story of a childhood spent on Corfu, told by a now-famous naturalist and conservationist. Not surprisingly, flora and fauna find their way into the pages.
- **The Colossus of Marousi** (Henry Miller; 1975) Few writers have matched the

enthusiasm expressed in this classic tale. Miller's fervour never flags as he leaps from one adventure to the next.

CRACKIN' HOLIDAY

Forget Christmas or birthdays. In Greece, the biggest day of the year is Easter when communities joyously celebrate Jesus' Resurrection. The festival begins on the evening of Good Friday with the *perifora epitafiou*, when a shrouded bier (representing Christ's funeral bier) is carried through the streets in a moving candle-lit procession. One of the most impressive of these processions climbs [Lykavittos Hill](#) in Athens to the Chapel of Agios Georgios. If you visit churches early in the morning on Good Friday, you'll often see the bier being decorated with countless flowers.

Resurrection Mass starts at 11pm on Saturday night. At midnight, packed churches are plunged into darkness to symbolise Christ's passing through the underworld. The ceremony of the lighting of candles that

follows is the most significant moment in the Orthodox year, for it symbolises the Resurrection. Its poignancy and beauty is spellbinding. The ceremony ends with candle-lit processions through the streets and fireworks representing the sound of the boulder rolling away from in front of Jesus' tomb.

The Lenten fast ends on Easter Sunday with the cracking of red-dyed Easter eggs, symbolising the blood of Christ and new life – taken together this represents the new life given through Christ's resurrection on the cross. An outdoor feast of roast lamb takes place in the afternoon, followed by Greek dancing. The day's greeting is '*Hristos anesti*' (Christ is risen), to which the reply is '*Alithos anesti*' (truly He is risen).

WHAT'S IN A NAME?

Religious festivals flood the Greek calendar. In fact, according to tradition, every day of the year is dedicated to a saint or a martyr. Christian Greeks are more likely to celebrate the day for the saint they are named after than their birthday. On a person's name day, greet them with *hronia polla* (good wishes and prosperity) and, if you go to visit or meet them out, take them a small gift. Islands and towns also celebrate the day of their patron saint with church services in historic chapels, feasting and often some dancing.
