PHILOSOPHY

THE BASICS

‘*Philosophy: The Basics* deservedly remains the most recommended introduction to philosophy on the market. Warburton is patient, accurate and, above all, clear. There is no better short introduction to philosophy.’

Stephen Law, author of *The Philosophy Gym*

Philosophy: The Basics gently eases the reader into the world of philosophy. Each chapter considers a key area of philosophy, explaining and exploring the basic ideas and themes including:

- Can you prove God exists?
- How do we know right from wrong?
- How should we treat non-human animals?
- What are the limits of free speech?
- Do you know how science works?
- Is your mind different from your body?
- Can you define art?

For the fifth edition of this best-selling book, Nigel Warburton has added a new chapter on animals, revised others and brought the further reading sections up to date. If you’ve ever asked ‘what is philosophy?’, or wondered whether the world is really the way you think it is, this is the book for you.

Nigel Warburton is Senior Lecturer at The Open University. He is author of several books including *Philosophy: The Classics*, *Philosophy: Basic Readings*, *Thinking from A–Z*, and *The Basics of Essay Writing* all published by Routledge. He is co-creator, with David Edmonds, of the popular philosophy podcast *Philosophy Bites*.
